

Following the establishment of Faculty of Traditional Medicine in 2012 in Tabriz University of Medical Sciences, first the licenses of two departments of traditional medicine and traditional pharmacy were obtained and then the license of medicinal history for master's degree was taken from the Council of the Development of Medical Sciences in 2013 by admitting 5 students for its first year. At present, with regular and organized planning, the educational and research programs of this group with the presence of prominent and expert professors inside and outside the university (other universities) and in particular, the macro-health policies announced by the Supreme Leader, especially Article 12 In the field of traditional medicine and its surrounding disciplines and the implementation of his orders, educational goals and programs are pursued with seriousness. Based on the strategic plan of the group and the potential that exists in the technical and specialized body of the department, we aim to obtain a specialized doctoral license in this field from the relevant authorities in the coming years.
